Detta är ett förslag för hur man kan placera plintarna (100-200 mm i diameter) för golvbjälklaget. Golvbjälkarna är med i byggsatsen, men inte plintarna. Använder man exempelvis 500-600mm långa murblock så kan man halvera antalet punkter. Lägg fuktskyddande papp mellan betong och trä

Tämä on ehdotus siitä, miten (100-200 mm läpimittaiset) jalat voidaan sijoittaa alapohjaa varten. Lattiapalkit ovat rakennussarjassa, mutta jalat ei ole. Kun käytetään esimerkiksi 500-600 mm pitkiä harkkoja, voidaan pisteiden määrä puoltaa. Aseta betoniin ja puun väliin kosteudelta suojava pähvi

A proposal for placing plinths (100-200 mm in diameter) for floor beams. Floor beams are provided in the kit but plinths are not included. For example, by using 500-600 mm long masonry units, one can reduce the number of points 50%. Place cardboard between the concrete and wood to protect from moisture

House	P6546-70 Eva 30m2	Sheet	21
Drawing	FOUNDATION PLAN - PLINTPLAN	Scale	1:50
Material		Date	13.12.2018
Drawer	RP	File	P6546-70 Eva 30m2 Foundation.dwg

Förslag på alternativ plintplan med bärlnor och plintar. Bärlnor 45x 95 eller 45x 120 och plintar ca 100- 200 mm i diameter. (Bärlnor och plintar ingår ej i leveransen). Används exempelvis murblock, (ingår ej i leveransen) istället för plintar, kan man lägga bärlnorna platt mot dessa och på det sättet minska höjden på konstruktionen. I denna konstruktion kan man dessutom lägga en "boardskiva" mellan bärlnorna och golvbjälkarna och på det sättet bära upp bjälklagsisoleringen. Lagg fuktskyddande papp mellan betong och trä

Endotus valitoehtoisestä jalustasta kannattajilla ja jaloilla. Kannattajat 45x95 tai 45x120 ja jalat läpimitataan n. 100-200 mm (kannattajat ja jalat ei ole toimituksessa). Käytettäessä esimerkiksi harkkoja (ei kuulu toimitukseen) jalkojen sijasta, voi kannattajat asettaa lappeelleen niitä vasten ja sillä tavoin vähentää rakenteen korkeutta. Tässä rakenteessa voi lisäksi asettaa lelyn kannattajien ja lattiapalkkien väliin ja sillä tavoin kannattaa alapohjan eristystä. Aseta betonin ja puun väliin kosteudelta suojaava pahvi

A proposal for alternative plinth beam layout plan. Plinth beams 45x95 or 45x120 and plinths ca 100-200 mm in diameter (plinth beams and plinths are not included in the kit). For example, by using masonry units (not included in the kit) instead of plinths, one can lay plinth beams flat against the masonry units and in that way reduce the height of the structure. In this construction one can also add "plywood board" between plinth beams. Place cardboard between the concrete and wood to protect from moisture
